

FOUR SIDED - PLASTIC BASE ROLL PALLET

Size: 735 x 850 x 1690mm

Capcon SKU 01 402 01

This 4-sided nestable A-frame roll pallet is manufactured from high quality steel and has a bright zinc plate finish. The three sides plus the two-piece split gate have a 50 x 50mm mesh infill structure. A hinged plastic drop down base is fitted as standard, the main base structure is rod infill. The roll container is fitted with the larger 125mm diameter castors, two fixed and two swivel, to improve manoeuvrability.

Key Features include:

- Market leading heavy duty A-frame design.
- Heavy Duty 25mm steel tube construction to back frame and trombone section for improved strength we can offer this as standard from ex-stock (UK).
- Recessed bolts for ease of loading.
- Hinged, plastic drop down base fitted as standard – three standard colour options: Blue, Red or Purple
- Catches secure gates when open to stop swing shut, reduces risk of injury.
- Noise reducing plastic inserts fitted to all hinges.
- Kick Bars to rear to prevent mesh damage
- ID plate fitted to back panel and front upper gate.
- Additional extras include: Hinge / loose shelves and a variety of castors.
- Hard wearing nylon castors fitted as standard.
- Two-piece split stable gate with locating slots for easy closing.

Benefits:

- Far better use of vertical space, mesh infill helps retain products for improved protection – ideal larger / taller products.
- Simple and easy to use design to be operated by a single person.
- Stable door style split gates for easy access to stowed products; access to higher packed products with the bottom gate close reduces risk of spilled merchandise.
- Plastic base provides added protection and cleanliness for stored products – example: laundry and delicate linens.
- Additional shelving improves product segregation and easier loading / unloading.
- Easiest way to transport goods and products from a warehouse/distribution environment direct to final destination such as a retail store.
- Adding rubber and sandwich castors will further improve noise reduction as well as help to reduce marking or damage to delicate flooring.
- Bright zinc plate finish helps to reduce corrosion.
- Space saving – sides, gate and base fold flush to the back panel allowing for roll cages to nestle together.
- Excellent RTP (returnable transport packaging), empty nested roll pallets require less vehicle space for return journeys ultimately reducing transport costs.
- Will accommodate two standard size 600x400mm Totes side-by-side, up to 3 high.

Industry Usage:

4-sided mesh infill roll pallets with plastic bases are a popular choice throughout the laundry and cleaning industries, providing added protection and cleanliness for delicate linens and fabrics.

Also used within hospitality, healthcare, food processing and healthcare for the storage and transportation of a range of products in and around a workplace or between destinations. High quality multi-use roll container for any environment.
